Principles of the Alexander Discipline Course

June 10-11, 2010
New York University
College of Dentistry
New York, NY

ALEXANDER
FOUNDATION
for ORTHODONTIC
RESEARCH
and EDUCATION

THE *Alexander* DISCIPLINE

Principles of the Alexander Discipline Course

The value of an orthodontic technique is its ability to be replicated by doctors around the world, producing similar results. Orthodontists in 42 countries are applying the Alexander Principles and consistently producing “rock solid” results and long term stability.

Through this course, Dr. Wick Alexander will share:

- Twenty Fundamental Principles that represent the foundation of his practice methodology
- The coordination of appropriate dentofacial orthopedics with specific archwire and elastics sequencing to meet dentofacial goals within predictable time frames
- How Alexander bracket design concepts, including their unique torque values, aid teeth in reaching ideal positions
- Precision placement concepts
- Retention mechanics that begin before brackets are removed

Dr. Wick Alexander

**Seminar presenters may have a financial interest in products mentioned in these courses.*
